11 ft. Cantilever Umbrella
Item #40049

Please contact one of our Product Specialists for assembly assistance or questions at 1-800-537-8484 or email ps@frontgate.com. Specialists are available weekdays 8:00 a.m. to 8:00 p.m. EST or Saturday 9:30 a.m. to 6:00 p.m.

ASSEMBLY AND OPERATION
SAFETY PRECAUTIONS:
• Close the umbrella in windy conditions or when a storm approaches.
• Do not allow the umbrella to flap in the wind; this could damage the canopy.
• Never leave an open umbrella unattended. If damage occurs, this is not covered by the warranty.
• When adjusting the umbrella, make sure that no person(s) or item(s) are close to the umbrella. This is important to prevent injury or material damage.

CARE AND MAINTENANCE:
• When not in use, close and cover umbrella with a protective cover.
• Allow a wet canopy to dry opened up.
• If necessary, clean the fabric with lukewarm water, mild detergent, and a sponge.
• Wipe sliding marks on the aluminum poles with a damp cloth.

REQUIRED FOR ASSEMBLY:
• 200 lbs. playground sand (not included).

NOTE: Avoid allowing sand into the center section of the base shell.
To INSTALL Main Frame (Two-Piece):
1. Loosen collar of base stem by turning counter-clockwise and install main frame (bottom section) into collar base stem. (Fig. 8).
2. Install main frame (top section) into main frame (bottom section) (Fig. 9).
3. Secure the main frame: Align the holes on the main frame top with the main frame bottom (screws in-place) and tighten screw #1, then #2 (Fig. 10).

To ASSEMBLE Collar Base Stem:
1. Re-insert the base stem into the base. Turn collar base stem clockwise to engage threading. Insert steel wrench provided into top of stem and tighten (Fig. 5). NOTE: To avoid damage to your base, do not over-tighten base stem.
2. Insert clamp onto base stem and align gaps with base stem grooves (Fig. 6).
3. Attach collar to top of the base stem by engaging threading. Do not completely tighten before inserting main frame (Fig. 7).

OPERATION:
To EXTEND and RETRACT Arm:
1. Insert crank handle fully into Socket A (Fig. 11), crank handle will snap into place, slowly crank the handle clockwise until crank handle stops and arm is fully extended. CAUTION: Arm must be fully extended before retracting. Do not over crank, as it will damage your umbrella.

To OPEN Canopy:
1. Insert crank handle fully into Socket B (Fig. 12), crank handle will snap into place, then slowly crank the handle clockwise until canopy is completely open and hub is inserted under center pole and crank handle stops.

To CLOSE Canopy:
1. Set canopy to horizontal position and turn crank handle Socket B counter-clockwise.

To ADJUST Shade:
1. Insert crank handle into Socket A (Fig. 13) and slowly crank counter-clockwise to desired degree of vertical shade.
FEATURE:
Base Collar Swivel:
1. Unlock the position of the umbrella by turning the collar of the base in a counter-clockwise direction (Fig. 14).
2. Grab the bottom pole section and rotate the umbrella frame (Fig. 15) in either direction to choose your desired location (Fig. 16).
3. After desired location is chosen, return the base collar back to its original position and lock umbrella position by turning the collar clockwise (Fig. 17).

BASE ASSEMBLY:
CAUTION: Fully assembled, the cantilever umbrella weighs over 300 lbs. Moving the umbrella fully assembled will increase the risk of damage to your umbrella and can cause serious injury. We recommend a two-person team to assemble the umbrella.

To ASSEMBLE Base:
1. Select area to set base and place in desired location.
2. Remove base lid from base shell (Fig. 1) then insert the base stem into the base shell (Fig. 2). Turn collar base stem in a clockwise motion to engage threading.
3. Fill base shell with dry playground sand (not included). When filling base, it is necessary to wet down sand after partial installation. (Fig. 3) Fill base with remaining sand and repeat wet down.
NOTE: Base weight will be 250 lbs. after sand is added.
4. Remove the base stem carefully and avoid allowing sand into the center of the base shell (Fig. 4).
IMPORTANT: Do not allow sand to spill into the center of the base (Fig. 4) as it will interfere with collar base stem installation.
5. Place base lid back onto base shell.

Avoid allowing sand into the center of the base shell.
