BATTERY WARNINGS:

• Do not mix new and used alkaline batteries.
• Do not use standard (carbon-zinc), lithium or rechargeable batteries (Nickel Metal Hydride).
• Do not mix new and old batteries. Replace all.
• Non-rechargeable batteries are not to be recharged.
• Used batteries should be removed immediately and must be recycled or disposed of properly according to governmental regulations.
• The supply terminals are not to be short-circuited.
• Only batteries of the same or equivalent type as recommended are to be used.
• Batteries are to be inserted with the correct polarity.
• Do not leave the batteries where a child or pet could play with or swallow them. If batteries are swallowed, contact a physician immediately.
• Do not dispose of batteries in fire—batteries may leak or explode.

NOTE: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
PARTS:

- LED Light
- Motion Sensor
- Safety Switch
- Battery Cover
- Battery Compartment
- Container Lid
- Removable Container
- Body
- Candy Chute
- Mode Selection
- Base
CLEANING THE DISPENSER:

**Important:**
- DO NOT clean in dishwasher
- DO NOT submerge body/base in water
- Make sure parts are dry before assembly
- Dispenser is in the off position before cleaning
- Clean before first time use
- Remove batteries before cleaning

**DISASSEMBLY:**
1. Remove the container lid by pulling up (Illustration 1).
2. Next, remove the container by rotating it counter-clockwise (Illustration 2).

**CLEANING:**
Wash the following parts with mild detergent:
- Container lid
- Removable container
Wash the following parts with a damp cloth:
- Body / Base
- Candy chute

**ASSEMBLY:**
1. Replace the container by rotating it clockwise
2. Replace the lid by gently pressing down.
**BATTERY INSTALLATION:**

**Important:** Do not mix new and old batteries. Replace all batteries (see battery warnings)

1. Remove the battery cover by pulling the tab (A).
2. Insert four AA batteries according to the correct polarities marked on the inside of the battery compartment.
3. Line up tabs (B) and (C) to the bottom right side of battery compartment and snap tab (A) back into place on the bottom left side of battery compartment.

**Optional Power Adapter (sold separately)**

**INPUT:** 100-240V ~ 50/60Hz  
**OUTPUT:** 6.0V DC 1000mA
**MODE SELECTION:**

**Important:** The amount dispensed is relative to the size of the snack. (i.e. more small candy pieces will be dispensed than large candy pieces at the same setting)

Turn the mode selection dial to the desired setting:
- **Mode 1:** 1.15 seconds
- **Mode 2:** 2.5 seconds
- **Mode 3:** 3.5 seconds
- **Mode 4:** 5 seconds

---

**RECOMMENDED CANDIES AND NUTS:**

**Important:** Do not use candy larger than 1/2” diameter

**RECOMMENDED:**
- Small gum balls
- Hard coated candy
- Hard coated chocolate
- Unsalted nuts
- Jelly beans
- Almonds
- Pistachios

**NOT RECOMMENDED:**
- Wrapped candy
- Soft coated chocolate or candy
- Square or cylindrically shaped candy
- Gummy candy
- Raisins
- Salted nuts
Important:
- DO NOT overfill the container
- DO NOT force candy into the container when filling
- The dispenser has a safety switch that prevents accidental activation. It will not operate if not placed on a hard flat surface.
- After filling it may take a few times for candy to dispense.

1. Remove the container lid by pulling up (Illustration 3).
2. Fill the container with the candy or nuts of your choice (Illustration 4).
3. Replace the container lid by gently pressing down.
4. Turn the mode selection switch to the desired setting.
5. Place your hand under the candy chute to dispense.
6. Remove your hand when all the candy is dispensed.
TROUBLESHOOTING:

Problem: (A)
There is candy inside the container but no candy is being dispensed.

Solution: (A)
- Square or cylindrical candy may bunch up at the chute opening. Tilt or gently tap the unit to break up any blockage.
- High temperature or humidity can cause the candy to stick together in the container. Tilt or gently tap the unit to break up any blockage and then move the unit to a cooler place.
- The dispenser has a safety switch that prevents accidental activation. It will not operate if not placed on a hard flat surface.

Problem: (B)
Nothing happens when hand or bowl is placed under chute.

Solution: (B)
- Ensure the mode selection dial is not in the “OFF” position.
- Replace the batteries.
- Debris may be on the sensors. Turn off the unit and gently clean the sensor with a damp cloth.
- Make sure your hand or bowl is directly under the chute.
- The dispenser has a safety switch that prevents accidental activation. It will not operate if not placed on a hard flat surface.

Problem: (C)
Sensor is activating when no hand or bowl is under the chute.

Solution: (C)
- Debris may be on the sensors. Turn off the unit and gently clean the sensors with a damp cloth.

Problem: (D)
The amount of candy being dispensed is inconsistent.

Solution: (D)
- Debris may be on the sensors. Turn off the unit and gently clean the sensors with a damp cloth.
- Square or cylindrically candy may cause the amount dispensed to be inconsistent.
- Large diameter candy may cause the amount dispensed to decrease in comparison to small diameter candy.
